

The Francis Crick Institute

FOUR YEAR PHD STUDENTSHIPS 2019

THE
FRANCIS
CRICK
INSTITUTE

The Crick is a multi-disciplinary biomedical discovery research institute in central London dedicated to understanding the fundamental biology underlying health and disease.

Our PhD programme is designed to attract the brightest scientific minds and is a fabulous opportunity for highly motivated and exceptionally talented people to embark on their career in biomedical research.

Crick students benefit from well-resourced research labs and state-of-the-art science technology platforms, excellent scientific and transferable skills training, and a supportive and stimulating research environment. They will register at one of the Crick partner universities (Imperial, King's, or UCL) and receive a non-taxable annual stipend of £22,000 plus payment of tuition fees.

Motivated and talented graduates with backgrounds in biological or biomedical sciences, physics, chemistry, mathematics and/or computer science are invited to apply. A number of collaborative projects provide the opportunity to undertake multi-disciplinary research with a Crick and a partner university supervisor.

Candidates of all nationalities can apply for the Crick PhD programme.

Application deadline: 12 noon (GMT) 13 November 2018
Interviews: 21 – 22 January 2019 (inclusive)
